AUDIENCE

This course is intended for beginning college students with some knowledge of electricity as would have been taught in an introductory college physics class. Secondly, it is expected students will have some basic knowledge of programming and logic design. No specific language will be assumed as prior knowledge but this class could be taken as their second programming class.

EXPECTATIONS

RAMESH YERRABALLI: Hi.
This is an introductory class modeled around EE319K, which we teach to freshmen in electrical engineering and biomedical engineering here at UT Austin.
JONATHAN VALVANO: There are two prerequisites for this class.
The first is computer programming.
